SpamTitan

Multi-Layered Email Protection for Managed Service Providers

SpamTitan Email Protection allows MSPs to offer customers advanced protection against spam, phishing, and malware threats. It uses advanced machine learning to identify and block new, sophisticated, email-borne attacks in real time. MSPs can rely on SpamTitan to protect their customers without maintaining servers or infrastructure in-house.

SpamTitan rejects 99.99% of malicious mail with front-line tests before reaching customer mail servers.

This multi-vectored approach scans emails to block phishing threats using:

- Realtime Blackhole Lists (RBLs).
- Recipient Verification.
- Sender Policy Framework (SPF).
- DomainKeys Identified Mail (DKIM).
- Domain-based Message. Authentication, Reporting and Conformance (DMARC).

Phishing and Malware Prevention

DNS Threat Protection and Content Filtering

Email Archiving

Advanced Spam Protection

Security Awareness Training (SAT)

Full Featured Encryption System

Key MSP Features

High-Performance Features

- Advanced Machine Learning.
- Real-Time Analysis.
- Geoblocking.
- Attachment Filtering.
- Extensive Email Scanning - Advanced features for outbound mail scanning and routing.
- Innovative Greylisting.
- Anti-Spoofing.
- URL Re-Writing.
- Time-of-click protection.
- Heuristic spam detection.
- Sandboxing provides a robust environment for in-depth, sophisticated analysis of unknown or suspicious programs and files.
- Clustered - across geographies if required.
- IP protection control.

Manageably Scalable

- Unlimited users, unlimited domains.
- Multi-level administration (user, domain, groups of domains).
- SpamTitan 'Private Cloud' provides dedicated email security in our data centers.

Effortless Setup and Configuration

- 100% cloud-based.
- Simple migration to SpamTitan, get set up, and start blocking threats in less than 1 hour.
- Highly configurable system giving complete control to an administrator.
- Spamtitan uses dynamic recipient verification to integrate with M365 to verify users – this simplifies the onboarding process and enables a swift migration.
- Works with any email provider and is easily configurable with M365.
- Streamlined process for uploading block and allow lists.

Market Leaders in Reporting and Mail History

- Cutting-edge email history search, filtering, and export functionality. Customers embrace this feature to assist with monitoring and troubleshooting.
- Extensive set of predefined, on-demand system reports available
- Unrivalled quarantine reports can be enabled, allowing end users to deliver, allow list, or delete their quarantined email.
- Available in 21 languages.
- Schedule reports to run periodically, with an option to send them to multiple email addresses.

Rebrand (White Label) and Integrate (API) into your Infrastructure

- White labelling.
- Extensive API set for integration with 3rd party management products.

Email Protection Leader — Small Business — WINTER 2023

SpamTitan & M365

Advanced threat analytics and world-class threat intelligence are built into the SpamTitan platform and add layers of defense, identifying more threats than Microsoft Security tools can on their own.

With SpamTitan, there are fewer misses, fewer false positives, and less spam, including malicious emails containing malware. No single technology provides security for everything; different layers are crucial. Relying on a single vendor for all your security needs can be risky.

Customer Quotes

"SpamTitan is great for Managed Services Providers. We are an MSP with clients of all sizes who desire managed spam protection. They need to see what messages are blocked and allowlist, if necessary, in a format their users can understand. We appreciate the simple, clean interface that allows us to quickly set up new clients and quickly find and take action on messages the client needs to see immediately. The support has been great."

Andrew Burke, Vice President ITMSP

"Great Buy for MSP. I was a GFI customer with multiple clients using their services. I was elated to find SpamTitan and its ability to serve my customers privately from an MSP perspective. Also, I was able to get quick answers, and I was able to buy the product directly from their website in minutes. Hands down, it is the best product I have found in the past five years. My favorite thing is my level of control over inbound and outbound mail from an MSP perspective."
